EDUCATION

GOVERNMENT COLLEGE OF ENGINEERING, AMRAVATI
B. Tech - Computer Science
December 2020 - June 2024
CGPA: 8.96

SKILLS

Languages:
Java, JavaScript, Python, C / C++, SQL

Frameworks:
Sencha ExtJS, React, Spring Boot, RESTful API, Tailwind

Databases & Tools:
MySQL, Git, Postman, Jupyter, VS Code

Core Concepts:
DSA, OOP, Distributed Systems, Concurrency, Performance Tuning, Design Patterns, Agile (SCRUM), Debugging, System Design, Automation

LINKS

Portfolio: dipesh9765.github.io
GitHub: dipesh9765
LinkedIn: dipesh9765
CodeChef: dipesh9765
Leetcode: dipesh9765
GFG: blackday_alpha

COURSEWORK

UNDERGRADUATE

- Data Structures & Algorithms
- Operating Systems
- Object-Oriented Programming
- Database Management Systems
- Software Development Life Cycle
- Artificial Intelligence / Machine Learning

EXPERIENCE

NOVATECH SOFTWARE | Associate Software Developer
January 2024 – Present | *Nagpur, MH*
Technical Stack: JavaScript, Java, Sencha ExtJS, React, Node.js, MySQL, Agile (SCRUM)

- **May 2024 – Present**
  - Engineered and integrated multiple LLM APIs (OpenAI, Azure) into an AI assistant, improving user productivity by **68%**
  - Implemented **Retrieval-Augmented Generation (RAG)** in the product, significantly enhancing AI's ability to answer complex user queries by leveraging user's existing data. Increased the user satisfaction by **87%**.
  - Built an AI assistant to guide users, auto-generate records from prompts, and analyse record quality using LLMs.
  - Designed and deployed a dynamic, role-based dashboard using Gridstack, improving specific team workflow efficiency by **73%**.
  - Spearheaded end-to-end development of a Use Case Flow Editor, enabling users to author structured flows and auto-generate **activity diagrams**
  - Integrated **AI-driven logic** into the Flow Editor to auto-generate structured test cases, enhancing development traceability and QA automation.
  - Leading a new **mobile app** for remote dashboard access, test execution modules, increasing product accessibility.
  - Led the migration of legacy desktop tools to a **highly scalable** web application using Spring Boot and Ext JS.
  - Developed custom Sencha ExtJS UI components (e.g., syntax highlighters) to provide a more intuitive and efficient experience for complex data entry.

- **Jan 2024 – Apr 2024** *(Internship)*
  - Designed and implemented a content-parsing engine that reduced record creation time by 95%, directly improving usability in a **customer-centric** product.
  - Ensured application **stability** and **robustness** by diagnosing and resolving critical cross-browser rendering bugs, improving the experience for all users.
  - Researched and Developed 3 minor projects that were later integrated into product.

PROJECTS

Big Data Searching System | **Technology**: Python, MySQL, JavaScript

- Engineered a **distributed** keyword search engine designed to handle **large-scale** data, processing queries across 10M+ records.
- Implemented inverted indexing and **concurrent processing** techniques to optimize performance, achieving a 70% reduction in search latency.

ACHIEVEMENTS

- *Finalist*, **Smart India Hackathon** 2022 — Top 1% of 50,000+ teams.
- *Bright Beginner Award 2025* — Recognized for standout contribution within first 6 months.
- *Talent Hunt 2024 Winner* — Ranked 1st among 10,000+ participants (L&T EduTech).
- *DSA/CP Advisor*, Google Developer Student Club — Mentored 100+ students.
- Solved 1000+ problems on Leetcode, GFG & CodeChef. CodeChef Rating: 1630.
- Co-convenor of Prajwalan 2k22, the college technical fest.
